ABOUT

M.S. student in Computer Software Engineering at Hanyang University, specializing in Artificial Intelligence. My research focuses on Self-Supervised Learning (SSL) and its learning dynamics — recently, I've been deeply interested in exploring Joint-Embedding Predictive Architectures (JEPA)-based world models.

EDUCATION

M.S., Computer Software & Engineering Hanyang University	2026 – 2028
B.S., Computer Science & Engineering Hanyang University	2020 – 2026

PUBLICATIONS

Understanding Feature Learning Dynamics in Isotropic Regularizers via BHEP Statistics
